## Video 18 S2

**Just when you thought we couldn't get any better, we present a new part of our Video product family, our new ENG workhorse: The Sachtler Video 18 S2.**

The second generation Video 18 offers an additional 8.8lbs in payload versus its predecessor, at the same attractive price point. The key values of the Video 18 S2 are the super smooth jerk free drag feeling, a repeatable and fast to adjust drag due to a stepped mechanism, Sachtler's unique Speedbalance counterbalance mechanism which is precise and fast to setup and a very wide payload range. All this in conjunction with Sachtler's proven robustness and reliability.

- The only head in its class to offer smooth head operation at -40°C to +60°C
- Ability to support a full Size ENG rig with up to 20 kg (44.1 lbs.)
- Super smooth drag performance
- Super smooth performance for an even greater payload at the same great price
- Weight: 4,1 kg / 9 lbs
- Payload Range: 2 - 20 kg / 4 - 44.1 lbs
- Balance plate / Sliding range: 120 mm / 4,7 in
- Counterbalance steps: 16 + Boost Button
- Drag: 7 horizontal and vertical drag settings + 0
- Tilt range: +90° / -70°
- Temperature range: -40° - +60°C (-40 - +140° F)
- Camera fitting: Touch & Go plate 16
- Tripod fitting: 100 mm bowl
- Pan bar: incl 1 telescopic pan bar (Pan bar Plus right)
- Level bubble: illuminated level bubble Type CR2032"

## Sachtler Bags

- Innovative products offering unique features such as Safe Shell, 7-layer protection, Griplock, LED lighting and Logo Frame
- Our bags are endorsed and used by leading professional creatives worldwide
- Our range is designed in a premium classic black finish to reflect our end users desires

## FSB Product Line

The FSB range currently includes the entry version FSB4, the mid range version FSB6 and the top of the line FSB8. The family incorporates the Sachtler Speedbalance technology, the established Sachtler damping, large load range, wide temperature range, and parking position for spare camera screws. FSB6 and FSB8 come with the option of a sideload or touch-and-go camera plate.

No other fluid head in this class can operate jerk free and consistently from frosty cold to extreme and dusty heat.

We recommend configuring the FSB heads with our award winning SpeedLock tripods. No tripod is more compact and faster than the SpeedLock 75 CF! The dual extractable tripod is locked with just three simple steps thanks to the patented quick clamping system. It is light weight at only 4.4 lbs at maximum torsional rigidity and holds up to 44 lbs.

### FSB6

- Weight: 5.7 lbs
- Payload: 2.2 - 17.6 lbs
- 10 counterbalance steps
- 3 horizontal and vertical grades of drag, +0
- Tilt range: +90° to -75°
- Slide range: 120 mm
- Temperature range: -40° - 60°c
- Camera fitting: Sideload S
- Head fitting: 75 mm
- Integrated flat base
- Pan bar type / number: 1, Type DV 75
- Level: Illuminated
- Adapter viewfinder extension: Optional

### FSB8

- Weight: 5.7 lbs
- Payload: 2.2 - 22 lbs
- 10 counterbalance steps
- 5 horizontal and vertical grades of drag, +0
- Tilt range: +90° to -75°
- Slide range: 4.7 in
- Temperature range: -40° - 140°f
- Camera fitting: Sideload S
- Head fitting: 75 mm
- Integrated flat base
- Pan bar type / number: 1, Type DV 75
- Level: Illuminated
- Adapter viewfinder extension: Optional

Sachtler Ace tripod systems are designed for videographers who use HD/SLR cameras and smaller camcorders together with accessories; we offer an Ace M version with a payload of up to 8.8 lbs and an Ace L version with up to 13.2 lbs. The Ace L fluid head features seven steps of counterbalance as well as a plate that features a 4.1" range of adjustment, so you can balance your small camera to a very precise degree. The Sachtler Ace L is currently Sachtler's lightest tripod system. The Ace M system is Sachtler's best value system. Ace Systems are best with the most popular DSLR's and small camcorders, like Panasonic GH4, Sony A7S, Canon C100 and Nikon IDC. Typical applications are corporate film, wedding and music videos.

No other tripod system in this price segment offers the professional and smooth head operation known from Sachtler. The system is lighter and more reliable than most of its competitors in this price range.

### Ace Tripod Systems

#### Ace-L:

- Payload up to 6 kg / 13.2lb
- 7-step counterbalance
- Lightweight carbon-fiber tripods with high torsional stiffness
  - Perfect with sliders or tripods with flatbase fixing
- The lightest of Sachtler's tripod systems
- Available in 3 system configurations

#### Ace-M:

- Payload up to 4 kg / 8.8lb
- 5-step counterbalance
- Patented SA-Drage technology
- Ideally suited for small HDV camcorders and video-enabled DSLR cameras
- Available in 2 system configurations

### Ace Accessories

#### Ace Follow Focus:

- Zero backlash (no play between FF and lens movement), fast to use hard stops and clamps, gearbox direction changable, friction wheel and gear drive which can be positioned on either side of the gearbox

#### Ace Base Plate:

- Adjustable height, spare screws, anti twist Block, optional 15 mm rods

#### Ace Mattebox:

- Two filter stages (one rotating), adjustable rod bridge height
- Includes three easy to release flags, two neoprene rings and an accessory bar

#### Shoulder mount:

- Solid point of contact and support for secure and smooth off-tripod shooting

#### Hand grips:

- Adjustable handles are fitted on a Universal Mount by two flyout arms that can be angled independently to bring the handles closer together or set them farther apart
- When the Ace rig is mounted on a fluid head, the handles can be used as double pan bars
